Adel Magdy Macknota

Full Stack .NET Developer | Angular | ASP.NET Core | C#

Email: adelmagdymacknota@gmail.com **Phone:** (+20) 01279792507 **Location:** Cairo, Egypt

LinkedIn: linkedin.com/in/adel-magdy-net **GitHub:** github.com/Macknota **Portfolio:** adelmacknota.vercel.app

Profile

Full Stack Software Engineer with a focus on **.NET Backend Development**. I turn complex requirements into clean, maintainable systems — building secure, high-performance backends with **ASP.NET Core Web API, .NET 8, Entity Framework Core, and SQL Server**, and intuitive frontends with **Angular 18, TypeScript, and JavaScript**.

I care about architecture decisions as much as working code — applying **Clean Architecture, Design Patterns, SOLID Principles, and Agile** methodologies to write software that scales and stays maintainable. Currently building a real-time social platform using **SignalR** and actively seeking a full-time software engineering role in Cairo.

Work Experience

.NET Developer Intern

Smart Up — Cairo, Egypt (Hybrid) | *Oct 2025 – Dec 2025*

- Contributed to the full SDLC of enterprise web applications using **ASP.NET Core**, handling both backend logic and SQL Server database design across 3+ modules.
- Developed and optimized scalable **RESTful APIs** serving multiple frontend clients, reducing integration issues by ~40% through clean code and Agile standards.
- Collaborated with the frontend team to integrate **REST APIs** and resolve cross-stack issues effectively through daily sync-ups and clear documentation.
- Managed tasks independently in a hybrid work environment, consistently delivering all assigned features ahead of deadlines.

Projects

1. Social Connections Platform (In Development)

Tech Stack: *.NET 8, Angular 18, SignalR, SQL Server, Entity Framework Core, ASP.NET Core Identity, Bootstrap*

Full-stack social networking application with real-time communication, built on a modular component architecture.

- Built a responsive Single Page Application (SPA) using **Angular 18** with modular component architecture and RxJS, supporting 10+ reusable components.
- Implemented real-time messaging and live user-presence tracking using **SignalR** hubs, achieving sub-second message delivery.
- Designed a secure RESTful API with .NET 8, **ASP.NET Core Identity**, and JWT authentication covering 15+ endpoints.
- Modeled Many-to-Many database relationships in **SQL Server** to support a 'User Likes' and 'Matches' feature across thousands of records.
- Integrated cloud-based photo storage and management, supporting multiple file formats.

2. Store — E-Commerce RESTful API

Tech Stack: *.NET 8, ASP.NET Core Web API, EF Core, SQL Server, Redis, AutoMapper, Docker, Stripe*

Production-ready backend for an online store platform, built with advanced software engineering patterns and practices.

- Architected the backend with **Clean Architecture** (Onion Architecture) across 4 structured layers to enforce strict separation of concerns and SOLID principles.
- Implemented the **Specification Pattern** with a Generic Repository, reducing repeated query logic by ~60% across the codebase.

- Optimized performance with **Redis** caching for basket data storage, improving read response time by ~50% compared to direct database queries.
- Secured all 20+ endpoints using **JWT** authentication and role-based authorization with zero reported breaches.
- Integrated **Stripe** for payment processing and Docker for containerized deployment, reducing environment setup time by ~70%.

Education and Training

Bachelor of Science in Computer Science

Faculty of Science, Benha University | *June 2023* | *Grade: Very Good*

Military Service: Completed (Dec 2024)

2025 — Back-End Diploma, Route Academy

Intensive training in C#, SQL Server, Entity Framework Core, and building enterprise-level REST APIs.

Technical Skills

- **Backend:** C#, .NET 8, ASP.NET Core Web API, Entity Framework Core (EF Core), LINQ, ADO.NET, SignalR, REST API, JSON, Dependency Injection
- **Frontend:** Angular v18, TypeScript, JavaScript, RxJS, Bootstrap, HTML5, CSS3, Responsive Design, SPA
- **Databases:** Microsoft SQL Server, Redis (Caching), T-SQL
- **Architecture:** Clean Architecture, Onion Architecture, Design Patterns, Repository Pattern, Unit of Work, CQRS, SOLID Principles, MVC, Microservices (basic)
- **DevOps/Tools:** Git, GitHub, Docker, Postman, Visual Studio, VS Code, SSMS, CI/CD (basic)
- **Methodologies:** Agile, Scrum, Code Review, Unit Testing

Soft Skills

- **Problem-Solving:** Break down complex technical challenges into clear, structured solutions.
- **Communication:** Explain technical concepts clearly to both developers and non-technical stakeholders.
- **Team Collaboration:** Work effectively within cross-functional Agile teams across frontend, backend, and QA.
- **Self-Management:** Manage tasks independently in hybrid environments, consistently meeting and exceeding deadlines.
- **Continuous Learning:** Proactively adopt new technologies and apply them in real projects (e.g., Redis, SignalR, Docker).
- **Attention to Detail:** Write clean, readable, well-documented code with consistent naming and structure.

Languages

- **Arabic:** Native
- **English:** Professional Working Proficiency (B2)
- **Spanish:** Beginner
